

AMENDMENTS TO THE ABSTRACT OF THE DISCLOSURE

Please enter the following Abstract of the Disclosure in the record:

A dishwasher machine with a compact device for spraying items to be rinsed is provided whereby the rinsing liquid is regularly sprayed in the rinsing container and the spray jets created by the spray device can be varied. To this end, the rinsing device comprises at least one spray channel which guides a rinsing liquid and comprises, on a side thereof facing the inside of the rinsing container, openings for the rinsing liquid and two open ends via which rinsing liquid can be supplied in a pressurised manner. At least one distributor is provided for regulating the supply of rinsing liquid to the spray channel in lieu of conventional mobile components such as spray arms, and various spray patterns can be produced by means of the distributor, improving the cleaning action of the dishwasher machine.
